

**Gregg Distributors - Langley**

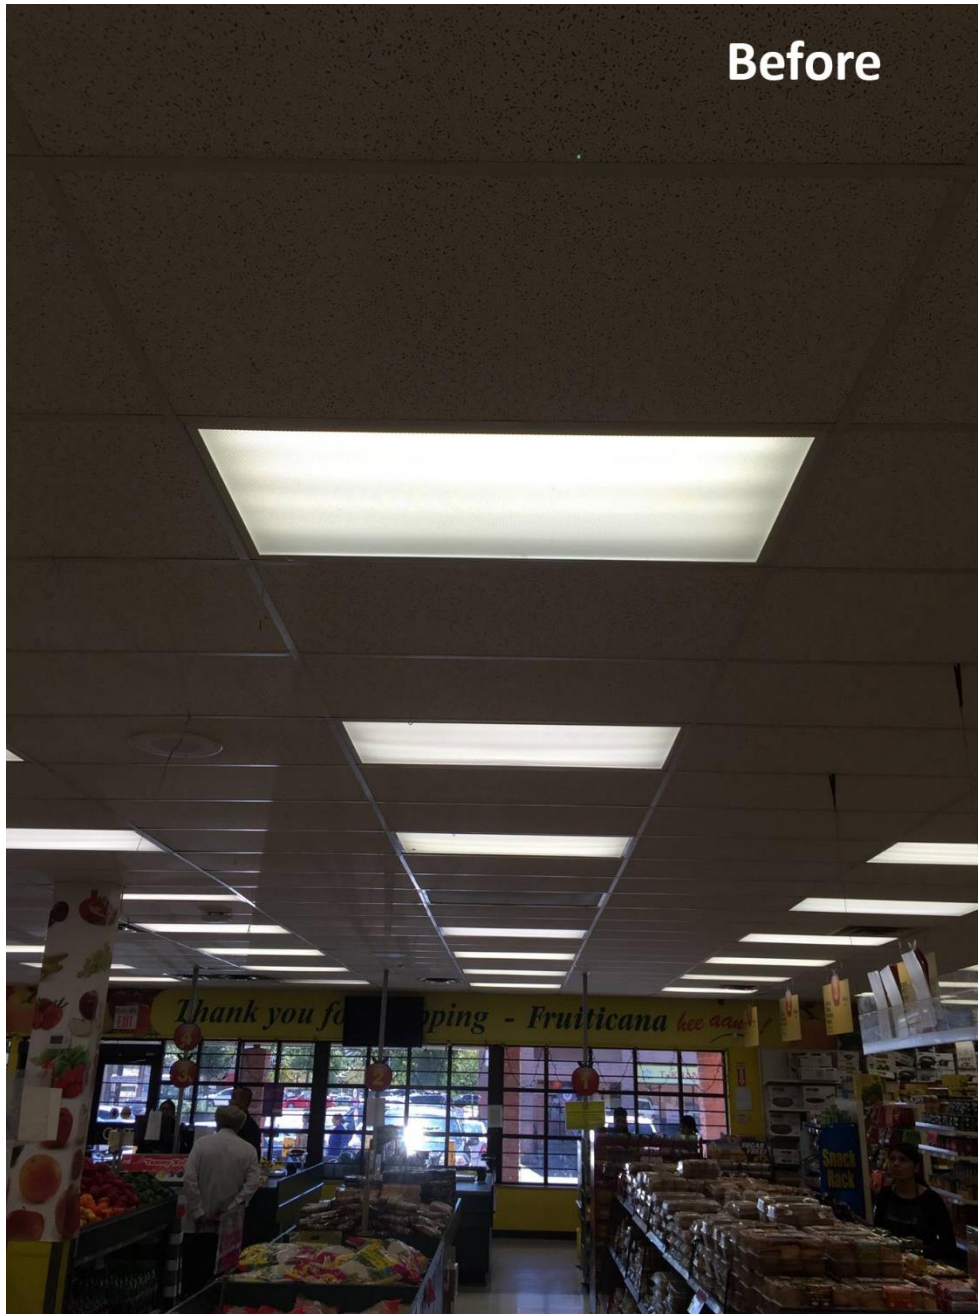

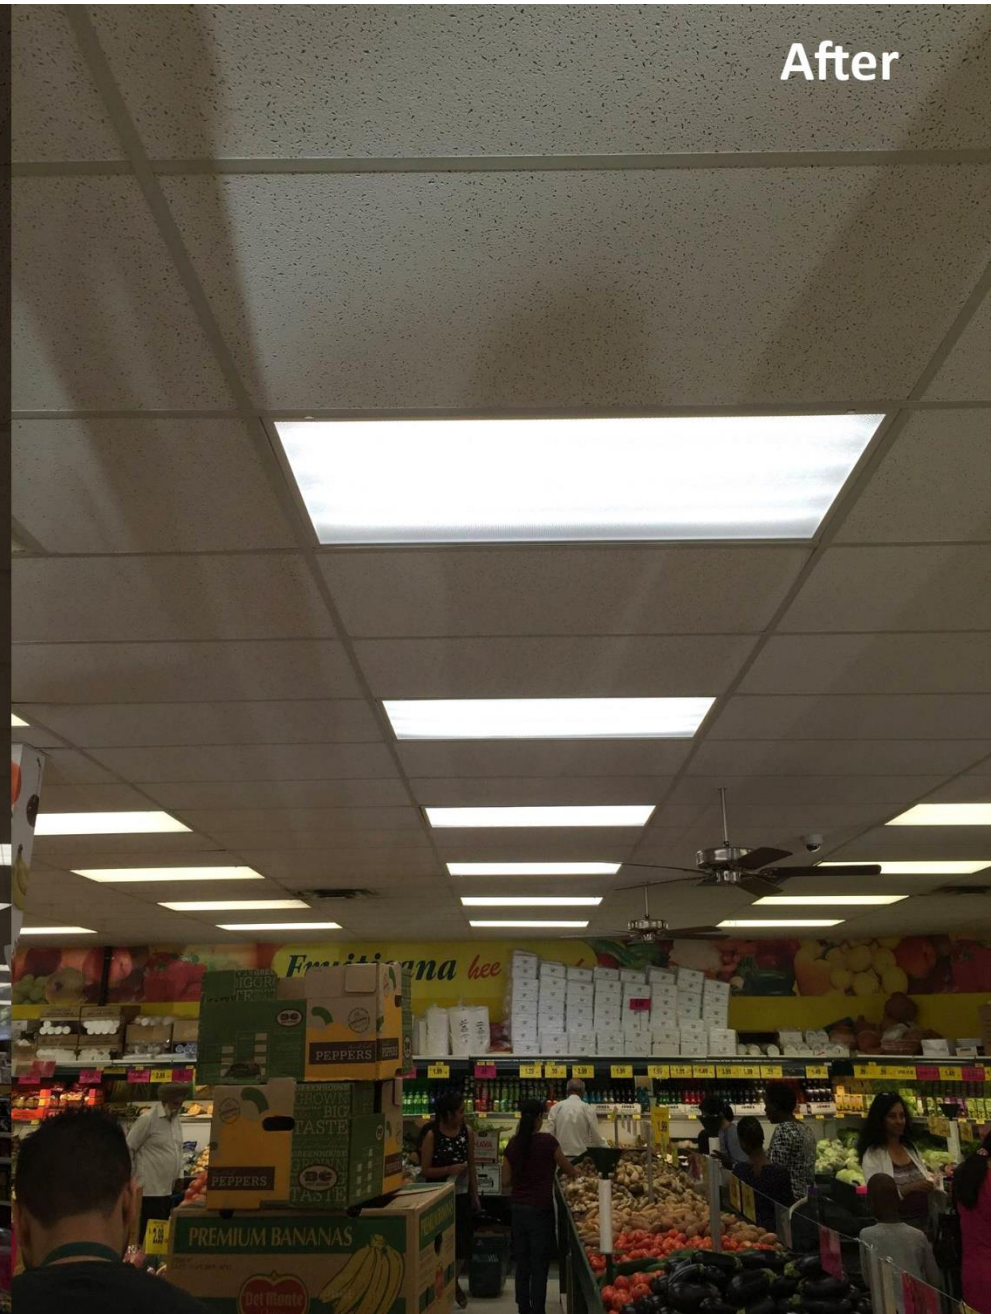

**Fruiticana - Northern Lighting installed T8 4ft LEDs, reducing the 38W fluorescent lighting to 18W plug and play. Giving 2200 lumens light output as compared to traditional fluorescent tubes, giving only 1000 lumens output. Our LED lights give a better CRI, zero insect attraction, 65% power efficiency, 6 times longer lifespan than fluorescents.**

## CORPORATE PROFILE

Northern Lighting is based in Richmond, British Columbia (BC). The company is set up in a 4500 square feet warehouse facility which houses our head office space for management and administration staff as well as inventory for receiving and distribution and a showroom. Our company has a branch office in Toronto ON and we provide Commercial & Industrial LED solutions from coast to coast.

Northern Lighting focuses on helping STRATA councils reduce their energy consumption as well as maintenance by providing only the best quality LED lighting that meets the CSA, cUL, ETL, Energy Star & DLC standards.

Canada Green Building Council  
Every Building Greener

### Why Choose Us?

Northern Lighting has received many awards and certification including the Green Building Certification, ensuring we meet the ASHRAE and the (LEED) Green Building standards with our high quality and high efficiency LED lighting products.

We supply only high quality, energy efficient products with the best warranty and product life span. In fact, Northern Lighting was the first to offer LED lighting solutions with a 5 year on site warranty in Canada.

City of  
Richmond

WORK SAFE BC

Given the current demand for LED installation in commercial facilities in the Lower Mainland and across BC and across Canada, the warehouse has the capacity to hold container loads of LED light fixtures including high bays, panels, street lights as well as T8 tubes (4 & 8 feet), Corn bulbs, Projectors, Floods and many others. Orders are booked in advance with enough lead time to ensure all components are available. Orders are delivered to each work site for our team of electricians to install same day.

Northern Lighting is focused on Commercial and Industrial clients and makes best efforts to implement a best practices policy, to ensure timely delivery and installation prior to final commissioning of the lighting systems. The company's operations are focused on quality merchandizing as well as customer relations, training, quality issues, product development and the promotion and sale of its innovative LED technologies.

We perform random tests and analysis to ensure that the output is of the required quality for all LED lights. Plus we provide extensive training and cooperation with our sales personnel, electricians and installers to ensure our quality standards are always a prominent aspect of the company's services.

## JIL CHURCH - VANCOUVER BC

We supplied all the energy efficient lighting for this newly renovated Church in Vancouver.

The main lighting included colour changing LED panels with remote controlling system, LED potlights, LED flat ceiling panels, LED Highbays.

The high CRI LEDs enhanced the look of the church while making it more vibrant and allowing for colour temperature control to set the right mood and ambience

## **TOSHIBA WAREHOUSE, BURNABY, BC**

We supplied and installed all the energy efficient lighting for the TOSHIBA warehouse who wanted to be energy efficient and reduce energy and maintenance costs along with have increased brightness. This was a retro fit project and the lights used were cool running commercial T5 LED tubes Linear Highbays which have external drivers.

**PRICEPRO**  
 Save Money  Change Lives

**PRICEPRO Surrey - An 85000 Sqf Hyper market.**

Northern Lighting has worked very closely with the management of this store to retro fit all the ceiling lights and all the parkade and the fridges and freezers with LED strip luminaires T8 4' 5' & 6'. We managed to achieve 65% efficiency with 2 times the brightness, 5 year warranty as well as better CRI. Best of all we managed to give our client an ROI of under 17 months based on their hours of operations.

Along with the store we also managed to retro fit their parkade with LED T8. These T8s come with standard 5 year warranty. They are 2200 lumen a tube with 85CRI and 18W. They are also ballast ready and work on 347V.

**NAPA Surrey. We changed the track lights from PAR30 95w halogen @50 CRI to PAR30 14w Energy star LED at 80 CRI. As you can see in the photo, the colours came to life and the visuals of the goods has improved.**

**We achieved 80% efficiency. The new product life span is 6 times longer than the traditional halogen plus the cost of the new LED has an ROI of 15 months based on their hours of operations. Not to forget that these new bulbs are 1200 lumens against 700 lumens giving the client almost 2 times more brightness...**

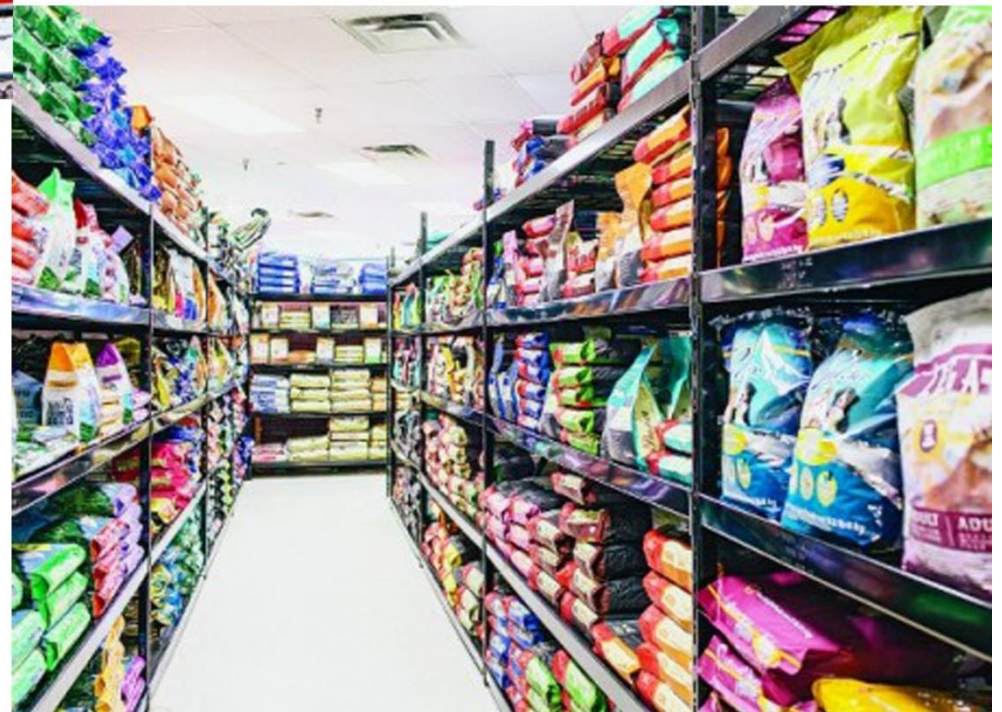

### Mr. Pet's - Port Coquitlam

The transformation of the showroom from the old fluorescent to T8 led has changed the showroom to a better more efficient lighting, as well as brought out the colours of the goods. Needless to say that the LED has zero insect attraction and zero UV rays that could be harmful to humans and animals alike.
